I have seen better free flash variants of Space Invaders on Kongregate before.

- Mouse controls were very unreliable in window mode
- Graphics and sound are nothing special
- All weapons are simple projectile weapons, just adding more damage or spread
- It is very easy as neither basic enemies nor bosses have any kind of special ability or awareness

Absolutely not worth its current price of 4,99\u20ac. Just get it for achievements with a good coupon.. Have just a few levels done but it is fun and hard to win sometimes... it is a real be liked game!. its hard if you like a challenge len get this!

. I bought this game. On sale so that was pretty sweet. The guns are a little slow but other than that it's a pretty good game..reminds me of space invaders. The bosses are a bytch though. You have to purchase the upgrades damn near everytime you go into a level. My upgrades tend to run out when i get to the boss though which bites. Anyways I give it an 8/10.. pretty good game
